DETAILED ACTION

Papers Received

Receipt is acknowledged of the applicants' amendment, response, and declaration, all received on 09 August 2004.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The rejection of Claims 1-64 under 35 U.S.C. 103(a) as being unpatentable over Stainmesse *et al.* in view of Cima *et al.* is hereby withdrawn.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-46 and 49-64 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-108 of U.S. Patent No. 6,607,784.

Art Unit: 1615

Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are substantially drawn to a process for preparing submicron-sized particles of an organic compound, which involves dissolving an organic compound in a water-miscible first solvent, mixing the resulting solution with a second solvent to define a presuspension, and adding energy to the mixture. In addition, the process steps recited in the instant claims substantially read on the process steps recited in the '784 patent with a significant overlap in scope.

Claims 1-46 and 49-64 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-15 and 18-21 of copending Application No. 09/874,499; Claims 1-99 of copending Application No. 09/874,637; Claims 1, 3-73, 75-77, and 110-118 of copending Application No. 09/953,979; and Claims 1-97 of copending Application No. 10/021,692. Although the conflicting claims are not identical, they are not patentably distinct from each other because all sets of claims are substantially drawn to a process for preparing submicron-sized particles of an organic compound, which involves dissolving an organic compound in a water-miscible first solvent, mixing the resulting solution with a second solvent to define a pre-suspension, and adding energy.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Art Unit: 1615

Response to Arguments

Applicant's arguments with respect to Claims 1-46 and 49-64 have been considered but are most in view of the new grounds of rejection under the judicially created doctrine of obviousness-type double patenting, presented above.

Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Simon J. Oh whose telephone number is (571) 272-0599. The examiner can normally be reached on M-F 8:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman K Page can be reached on (571) 272-0602. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
